

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 21, 2007

Water Body Under Evaluation:

Water Body ID #: 0737
Name: Cedar Creek (Class C)
Length of Segment: 33.0 miles
County(ies): Callaway

Use Attainability Analysis (UAA) Study:

UAA ID #: 0641
Submitter: SES, Inc.
Date(s) Conducted: August 29 - 30, 2007
Date Received: September 10, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. No interviews were conducted during the survey. People wading were observed at Site 1. Campsites, firepits, rope swings and an inflatable raft were observed at Site 16. Two comments from the 2005 public comment period confirm existing Secondary Contact Recreation (SCR) use.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the median depth criterion at 1 of the 14 sites evaluated and the maximum depth criterion at 6 of the 14 sites. Due to meeting the depth criteria, and evidence of WBCR (rope swings, inflatable raft), the committee recommends the WBCR use designation be retained. Due to observed SCR, evidence of SCR, and comments confirming existing SCR, the committee recommends SCR be assigned.

Committee Recommendation: ☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
